CAPITAL COMPUTING SOLUTIONS

Tailored Training available

Customised training is able to be delivered to your organisation. Training on exactly what you do and how you use Content Manager.

To customise the training, about a week is spent on premise making the training manuals and using screenshots from your actual environment. This gives a realistic approach to training, as manuals and training are based on your actual live environment.

Training can be established for end-users, power users, workflow, archiving and sentencing. Administrator training is also available.

So if you wanted your organisation to have updated or refresher training on Content Manager, or be shown how to use new features and functions in Content Manager, then customised training tailored to your specific needs may be exactly what you want.

Contact **Scott Brown** on 0439 153 858 for further information and training/consultancy availability. www.capitalcomputingsolutions.com.au
